Employment History

Thoughtworks, Bangalore   **May 2022 - Present**

Valuelabs, Hyderabad   **Sep 2021 - May 2022**
    4X – Benefit focus Client (Sep 2021 – May 2022) **: HealthCare Domain**
4x enrolment project which was developed based on monolith architecture. Here we develop rest api's using below techstack.
Utilized : Agile(Jira) , AWS, Java 8, Spring, Hateoas, Swagger, OracleDB, Jenkins, Sonarqube, IntelliJ, Nexus, WebLogic

Mphasis, Bangalore   **Mar 2019 - Sep2021**
    Sam's Club Supply Chain – Walmart Client (May 2020 – Sep 2021) : **Retail Domain**
Sam's club is an entity in Walmart. All the active membership users receive free shipping on all eligible items. Here we develop microservices with REST APIs using spring boot and java.
Utilized : java, spring boot, azure, jenkins, kubernetes, testng, cosmos, eventhub.

    EMTR – Charles Schwab Client (Mar 2019 – Apr 2020) : **Financial Banking Domain**
EMTR means **employee** management trade rules. This application is used by the client in the process of trading life cycle. Here we develop the REST API's using spring boot and java
Utilized : java, spring boot, pcf, bamboo, junit, cucumber, mongodb, sonarqube, splunk.

Infosys Equinox, Coimbatore   **Dec 2012 - Mar 2019**
    Ecommerce Platform – **Infosys Product** (Jan 2017 – Mar 2019) : **Ecomm / Retail**
E-Commerce Platform is unlike any other full-stack commerce offering. Other platforms are often monolithic in nature, built as a single, tightly coupled unit. Modifications are difficult, especially when commerce is moving at lightning speed and it is increasingly challenging to keep up. E-Commerce, born digitally native, is built using modular microservices architecture. Microservices allow you to ideate and release updates quickly, iterating on new features over the course of days instead of months. Innovate with confidence and delight your customers by delivering precisely what they want, when they want it**.**

    Note: From 2012 to 2017 worked on different e-commerce projects with different clients like staples, Ilbean, toysrus etc..!

Project Responsibilities
- Involved in Gathering the Requirements, Design, Backend Coding, Testing & Deployment.
- Involved in End-to-End SDLC Process, CICD Process, Following SOLID, Design Principles in Coding.
- Guiding Team Members.
- Conducting the Brown Bag Sessions on Technical Topics.

Skills

• Object Oriented Design	• Java	• MySQL, MongoDB, Cosmos
• Refactoring	• Spring Boot	• RabbitMQ, Active MQ, Azure EventHub, Service Bus
• SOLID Design Principles	• Tomcat	• Apache Solr
• Data Structures	• Redis	• Docker, Kubernetes, AWS, PCF, Azure

Achievements:

 • Received Framework Award from CEO and many awards like Distinguished Service Award, fond Points from Architects, exceptional delivery team award, couple of spot awards along with prize money, star of the sprint, monthly summit award, cross team appreciation awards.
